Did You Know?
Ensure your dog has ample access to water and take walks in early morning or at night to avoid dehydration.
Hot pavement can burn your dog's paw pads. Check sidewalk temps with your hand or foot. If it's too hot for you, it's too hot for them!

Air °F	77°	86°	87°	Skin destruction can occur in 60 seconds at 125° F.
Asphalt °F	125°	131°	135°	An egg can fry in 5 seconds at 131° F.

Another thing to be mindful of is that the temperature of pavement is far, far hotter than the air around you and can burn a dogs feet!

Be very careful of your Shelties feet in hot weather and also when it is very cold outside!
